## **Brush Pick-Up**

### **Brush Changes - Effective April 2025**

**The Village of Fayette has eliminated the bunker for brush drop-off near the water tower off North Eagle Street. All brush is curbside pick-up only.** It is not accepted at the compost facility (old barn). Bunkers will still be available for leaf and grass debris at this location. The Village crew will be making weekly rounds, during the period of March through December, of the entire village starting on **Monday or the first business day of the week** and continuing until complete. Please place all brush on the Village right-of-way for pick-up, so that it does not impede traffic, present a hazard to pedestrians, block storm drains, alter the flow of storm water, block sidewalks, ditches, etc. or in any other way or manner, endanger the general public.

**NOTE:** Brush is defined as chopped-off tree branches and low, woody growth such as brushes and small trees. No brush larger than 3 inches in diameter and all brush must be piled with all cuts ends pointed towards the street. All dirt and debris must be removed from the upper plant structure and roots. All thorny materials and branches must be bundled separately into bundles no larger than one foot in diameter and tied securely with string. Brush rejected for pick-up must be removed from the right-of-way within three days. **Brush generated because of hired tree service work is not eligible for chipping and will not be chipped as part of our route.**

### **Requirements**

- Brush cannot exceed 3-inches in diameter.
- Brush cannot exceed 6 feet in length
- All cut ends of brush must be piled toward street.
- All thorny material must be bundled separately.

### **Items Not Accepted**

- Construction material
- Grass and weed cuttings
- Hired tree service work
- Ivy
- Stumps
